Work History

Freelance Web Developer

Upwork | Oct. 2022 - Current

- Conducted discovery meetings to establish project details, create a timeline, and discuss the budget, resulting in clear project expectations
- Created both written and visual standard operating procedures for clients ensuring consistent and efficient updates to their sites
- Provided detailed scope documents to ensure all tasks and needs are represented and provided a budget for the project
- Conducted research on plugins or custom solutions for custom functionality
- Created mock-ups to help improve user experience of a page's layout or functionality
- Provided clients with detailed daily or weekly updates to ensure clear communication was upheld

Front-end Web Developer

Explore Digital | Feb. 2016 – Jan 2021

- Developed procedures for new projects and websites used to enhance production flow
- Assisted in the hiring process by conducting skill assessments and contributing to final hiring decisions
- Played a key role in gaining Shopify clients by using my understanding of PHP and the similarities it shares with Shopify's liquid language
- Collaborated with the design team to brainstorm website functionality and layouts
- Created Standard Operating Procedures documents for clients so they would have the ability to update their site
- Assisted the Chief Technical Officer with launching and maintaining websites on Google Cloud Compute Engine to ensure smooth operations and successful site performance
